How do plan to get there

The actions I need to take now is to keep focussed on my education and keep trying my best to get the best scores and grades that I can while still being able to be social with my friends so I don't burn out.
The qualifications that I might need for the job that I might want to do is my Biology, Chemistry and Maths GCSE + A Levels.

Short term goal - Regularly revising every week so that I am confident in all my subjects and fully prepared for my GCSE exams as well as finally deciding what I want to do as a job.

Medium term goal - Getting the necessary A Levels for University and getting my qualifications.

Long term goal - To finally start working in my job, working hard but still enjoying every moment of my job by helping people as well as my friends and family.
